

CLAIMS

Claim 1. A liquid composition containing an amide group-containing guanidine derivative represented by the following general formula (1):

(in the formula, R^1 and R^2 are independently hydrogen atom or a linear or branched alkyl group or alkenyl group with one to 4 carbon atoms and may be the same or different; R^3 represents a linear or branched alkyl group or alkenyl group with one to 22 carbon atoms; and X represents a linear or branched alkylene group or alkenylene group with one to 10 carbon atoms) or/and a salt thereof (component A) and at least one (component B) selected from the group consisting of an inorganic salt, an organic acid salt, a nonionic surfactant and an ampholytic surfactant with an action to suppress the generation of the precipitate of the component A, in which the blend ratio of the component A/component B (in weight ratio) = 1/0.5 to 1/20.

Claim 2. A liquid composition according to claim 1, wherein the inorganic salt is selected from the group consisting of sodium chloride and potassium chloride.

Claim 3. A liquid composition according to claim 1,

wherein the organic acid salt is selected from the group consisting of sodium glutamate (monohydrate), sodium aspartate, potassium aspartate, sodium lactate, potassium lactate, sodium malate, potassium malate and potassium acetate.

Claim 4. A liquid composition according to claim 1, wherein the nonionic surfactant is selected from the group consisting of sorbitan fatty acid ester, polyoxyethylene sorbit fatty acid ester, polyoxyethylene hardened castor oil, polyethylene glycol fatty acid ester, polyoxyethylene hardened castor oil pyroglutamate ester and polyoxyethylene glyceryl pyroglutamate ester.

Claim 5. A liquid composition according to claim 1, wherein the ampholytic surfactant is selected from the group consisting of carbobetaine-type ampholytic surfactants, sulfobetaine-type ampholytic surfactants and hydroxysulfobetaine-type ampholytic surfactants.

Claim 6. A liquid composition according to any one of claims 1 to 5, wherein R^3 in the general formula (1) is a linear alkyl group with 11 carbon atoms.

Claim 7. A liquid composition according to any one of claims 1 to 5, wherein R^1 and R^2 in the general formula (1) are individually hydrogen atom; R^3 is a linear alkyl group with 11 carbon atoms; and X is a linear alkyl group with 4 carbon atoms.

Claim 8. An impregnated supporting base material such as wet tissue, as prepared by impregnation with a liquid

composition according to any one of claims 1 to 7.

Claim 9. An external agent for skin, as prepared by blending a liquid composition according to any one of claims 1 to 7.

Claim 10. A mouthwash agent prepared by blending a liquid composition according to any one of claims 1 to 7.

Claim 11. A premix of a liquid composition according to any one of claims 1 to 7, the liquid composition containing an amide group-containing guanidine derivative represented by the general formula (1) or/and a salt thereof (component A), and at least one (component B) selected from the group consisting of an inorganic salt, an organic acid salt, a nonionic surfactant and an ampholytic surfactant with an action to suppress the generation of the precipitate of the component A, and an appropriate amount of a routine additive if necessary.
